SHORT COURSES IN THE DAIRY SECTOR

...for quality, market relevant,
entrepreneurial and gender
sensitive courses

www.dairytrain.org

Dairy Training Institute in partnership with Egerton University

is offering the following short courses for different actors in the Dairy Value Chain (DVC)

Hygienic Milk Handling and Processing

This course is designed to enable the trainees produce clean milk that is safe for human consumption, has the longest shelf-life and highest profits by reducing avoidable losses and rejects along the DVC.

Milk Testing and Quality Control

Meant for milk graders, cooler attendants/technicians/managers, milk bar operators, extension and quality control staff, this course aims at ensuring that milk delivered by farmers is tested and recorded to ensure high quality standards of milk for processing and consumption. The course covers topics in milk composition and properties, factors affecting milk quality, milk sampling, testing, recording and quality management.

Entrepreneurship and Agribusiness

This course is designed to develop entrepreneurial capabilities in agribusiness for all actors along DVC in order to increase productivity of farm production, improve agribusiness linkages and produce market based and demand driven products leading to diversification and increase in dairy related enterprise.

Milk and Milk Products Marketing

This course is specifically prepared for the farmer groups, milk traders/bar operators, dairy extension staff and cooperatives to build their capacity on marketing concepts along DVC. The course objective is to enhance knowledge of the players in DVC on marketing, change their mindset towards market-oriented production and increase volume of their produce.

Dairy Cow Management

This course targets dairy farmers, farm managers and extension officers with an aim of increasing productivity of the dairy farm. It covers the topics in business development in DVC, the common dairy cattle breeds in Kenya and the production systems involved, breeding, calf rearing, clean milk production and nutrients requirements for calves, heifers and lactating animals.

Feed Formulation and Milling Technology

This course targets dairy farmers, extension officers, feed millers, farm managers and sales personnel in the feed industry. The course covers topics in digestive systems of ruminant and non ruminant animals, nutrition requirements of dairy cattle at all phases of growth and how it can be availed and feed formulation in terms of available ingredients, methods of formulation, mixing and presentation.
